

The Fight for Maglev: Making America the World Leader in 21st Century Transport

By James Jordan, James Powell, Gordon Danby

Createspace, United States, 2012. Paperback. Book Condition: New. 226 x 157 mm. Language: English . Brand New Book ***** Print on Demand *****.The Fight for Maglev tells how Maglev, the first new transport mode since the airplane, will soon transform transportation in America and the World. 300 mph magnetically levitated and propelled vehicles have no engine, do not burn oil, do not emit pollutants and greenhouse gases, and are very quiet and comfortable. They carry passengers, personal autos, highway trucks, and freight without weather or congestion delays, at much lower cost than driving or flying, saving every American \$1000 dollars per year. The book tells how the authors, James Powell and Gordon Danby, invented Maglev in 1966 and why the US failed to develop it. Their 1st generation Maglev now operates in Japan. The authors describe how their new, more capable 2nd generation Maglev system, built as a 29,000 mile National Maglev network, will provide millions of new manufacturing jobs and billions of dollars in exports, while greatly reducing highway deaths and injuries and oil imports, if the U.S. acts to implement it. Otherwise another country will become the World leader in Maglev. For Science and Technology Readers: The authors...
